

APR™ Adjustable Passive Radiators

CSS is pleased to announce their new patent-pending Adjustable Passive Radiators (APR). These come in 10", 12" and 15" sizes and all feature a unique centre tube which allows additional weight disks to be added even after the unit has been mounting in an enclosure.

The cap on the centre tube can be unscrewed allowing weight disks or washers to be added to the tube. The centre bolt is threaded and permits the enclosed washers to be put on top of the last weight added. The wing nut can then be used to tighten everything down.

Each APR™ comes with 20 50 gram disks.
